## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-14, and 22 drawn to a system including negotiating a contract before planting for a crop, classified in class 705 subclass 37.
- II. Claims 15-21, drawn to a system for selling a crop including an auction, classified in class 705 subclass 37.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are directed to related subject matter, the production of certified crops. The related inventions are distinct if the (1) the inventions as claimed are either not capable of use together or can have a materially different design, mode of operation, function, or effect; (2) the inventions do not overlap in scope, i.e., are mutually exclusive; and (3) the inventions as claimed are not obvious variants. See MPEP § 806.05(j). In the instant case, the inventions as claimed cannot be used together in that either the grower negotiates a contract before planting, or an auction later in the cycle. In order to have both a contract and an auction, the crop would be sold twice, and that would be a different system. Furthermore, the inventions as claimed do not encompass overlapping subject matter and there is nothing of record to show them to be obvious variants.
